

Disaster Recovery Planning

Around the clock Monitoring

SQL on Call servers will watch your servers. You have a DBA on Call.

Expert Staff

Our staff will become your staff. We have SQL Server MVP's, book authors, public speakers, educators and conference chairs.

Confident

Our staff will make sure that you are confident in your SQL Server. This will allow you to spend your time working on the issues that are the most important to your company.

- **Multi Layer Outage Protection** – SQL on Call will review your requirements and your Disaster Recovery Plan to make sure you are prepared, no matter what the outage.
- **Worst Case** – We help you plan for the worst case.
- **Planning** – SQL on Call will help with changing your plans and testing your plans.
- **Business Continuation**– With SQL on Call on your team, your business will continue after disasters occur.

When a disaster strikes and you have SQL on Call on your team, you can rest assured your plan will be solid and your company will weather the storm. From the planning phase to the testing, SQL on Call will be with you through the process.

SQL on Call looks at all facets of a disaster. It could be a hard drive failing or it could be a hurricane. SQL on Call will make sure you are ready for your business to continue. SQL on Call will work within your budget to make sure that planning for a disaster does not overcome the need to run your business.

A professional service with a personal touch, our staff will quickly integrate with your team. Our Pro-Active Maintenance client has a Primary DBA and a Secondary DBA assigned to them. With our staff working closely with your staff, we will gain an in-depth knowledge of your database and its inner workings. We can make recommendations that will improve your performance, stability and recoverability. Each one of our DBA's will make sure that we recommend the best solutions for your company. They will evaluate and consider all aspects of your goals including timelines, budgets and requirements.

TECHNICAL SUPPORT

Proactive Maintenance Clients will receive a discount off our already low consulting rates.

About SQL on Call

SQL on Call is your one stop source for SQL Server assistance. Our goal is to become an extension of your IT department so you don't have to extend current head count to fill your SQL Server needs. SQL on Call services will allow your existing staff to focus on projects.

SQL on Call was founded in June of 2006 and was built on the foundation that all companies need an IT Staff to support their current business.

Our Mission is to help keep you focused on moving your business forward by making sure you do not have to worry about your databases.

"SQL on Call has been a lifesaver for our company! We needed our own SQL Server but also required a qualified team of people that could operate it for us and do maintenance. They have been ***extremely*** helpful and patient while we got our server installed. After it was online they created the databases we wanted very fast.

So far I have been very pleased with the service received and would recommend SQL on Call to anyone that needs a SQL database management team!"

- Amanda, Body Art Forms

"SQL on Call is terrific. Chris and his team are top notch. Our relationship started with a SQL Reports project. We were so happy with the results that we have used them for other database projects that are beyond our expertise."

- Dave Carroll, Sports Websoft

System Requirements

- We support SQL Server 7.0 to SQL Server 2008
- Ability to connect to your SQL Server via VPN or IP
- SQL on Call will not install any agents
